

- Powerful induction motor is totally enclosed. No brushes or commutator to wear out - ever!
- Orbiting transmission runs at over 1725 orbits per minute. The random orbital drive means no torque gouging, swirling or vibrations.
- The 19" apron with vacuum connections control and collect sanding dust to create a lightweight, high-productivity screen sanding machine.
- Vacuum "T" mounted on the buffer handle lets you collect sanding dust with a backpack or canister vacuum.
- A 16" sanding screen lays under a pad driver fit with a standard 16" scrubbing pad. *No special screen centering or locking hardware is required - easiest screen mounting system on the market!*
- Safety-enhanced, non-conductive dual triggers eliminate shock potential. A safety interlock switch prevents unexpected startups. 50-foot long power cable covers large areas.
- Free-floating, 14 gauge chromed steel handle has an easy kick release and an automatic locking system.
- 5 inch, non-marring transport wheels.
- Order a green bristle-style pad driver (53304-01) or a black hook-style pad driver (53269-01-0327).
- Order 16" sanding screens; 60 grit (#S06016), 80 grit (#S08016); 100 grit (#S01016), 120 grit (#S01216) and 150 grit (#S01516).
- To use the LOW BOY[®] for standard floor care tasks, order a black carpet brush (#82002), tan union mix polishing brush (#82010), white scrub brush (#82001) or a nylon grit HD scrub brush (#82003).
- 5 year motor warranty. 1 year overall.
